Contents

- 1 Foundations of artificial intelligence in healthcare IT: an overview of innovation.....1**

- 2 Artificial intelligence in medical diagnostics: enhancing accuracy and speed in disease detection.....16**

- 3 Machine learning algorithms in personalized treatment planning.....33**

- 4 Artificial intelligence -driven patient monitoring: Real-time insights for proactive care.....50**

- 5 Natural language processing in healthcare: Unlocking insights from clinical data.....72**

- 6 Robotics and artificial intelligence in surgery: Precision, safety, and innovation.....89**

- 7 Artificial intelligence in chronic disease management: Proactive solutions for long-term care.....110**

- 8 Ethical challenges in artificial intelligence-driven healthcare systems.....132**

- 9 The role of artificial intelligence in population health management and public health strategies.....144**

10	Artificial intelligence -powered drug discovery and development: Accelerating innovation.....	162
11	Challenges and barriers to implementing artificial intelligence in healthcare IT.....	187
12	The future of artificial intelligence in healthcare IT: Trends, opportunities, and predictions.....	203
